

Do-It-Yourself (DIY) Guide Using ENERGY STAR® Product Finder

What is ENERGY STAR® Certification?

ENERGY STAR® is the industry standard certification for energy efficient appliances. Georgia's Home Energy Rebates uses the ENERGY STAR® certification to determine whether the selected electric appliance is eligible for a rebate.

Using the ENERGY STAR® Product Finder

1. Open your preferred browser, e.g., Chrome, Safari, Microsoft Edge.
2. Go to energystar.gov/productfinder.
3. From the ENERGY STAR® Product Finder, navigate to "Appliances." Under Appliances, click on Residential Electric Cooking Products.

The screenshot shows the ENERGY STAR Product Finder website. At the top, there is a navigation bar with the ENERGY STAR logo, links for 'ABOUT' and 'FOR PARTNERS', a search bar, and a secondary navigation bar with links for 'Find Products', 'Save at Home', 'New Homes', 'Commercial Buildings', and 'Industrial Plants'. Below this, a breadcrumb trail reads 'Home » Energy Efficient Products » Product Finder'. The main heading is 'ENERGY STAR Product Finder', with a language selector for 'English | Français' and a link for 'Access to ENERGY STAR Data Sets and API'. A large banner image features a refrigerator, a washing machine, and a television on a green hill, with text explaining the benefits of ENERGY STAR certification. Below the banner, a blue bar prompts users to 'Select a product category to begin.' and provides a link to 'Learn More About Products'. The main content area is divided into three columns: 'Appliances', 'Data Center Equipment', and 'Other'. The 'Appliances' column lists various categories, with 'Residential Electric Cooking Products' highlighted with a yellow box. The 'Data Center Equipment' column lists categories like 'Data Center Storage' and 'Enterprise Servers'. The 'Other' column lists categories like 'Electric Vehicle Chargers' and 'Lab Grade Refrigerators and Freezers'. A 'REBATE FINDER' section on the right includes a brief description and a 'SUBMIT' button.

4. On the ENERGY STAR® Electric Cooking Products webpage, there is a list of all the ENERGY STAR® certified cooktops and ranges. The “Filter Your Results” section on the left side has many categories to refine your search.

The screenshot shows the ENERGY STAR website's electric cooking products page. At the top, there's a navigation bar with links like 'ABOUT', 'FOR PARTNERS', and a search bar. Below this, a breadcrumb trail reads: Home » Energy Efficient Products » Product Finder » ENERGY STAR Certified Residential Electric Cooking Products. A prominent blue banner says 'Find and Compare' with a 'Change Product' button. To the right, a family photo is accompanied by the text 'Together we can create a healthier planet for all of us.' and a 'LEARN MORE' button. A yellow arrow points to the 'Filter Your Results' sidebar on the left, which is highlighted with a yellow box. This sidebar includes a keyword filter, 'Product Type' (with radio buttons for Cooktop (40), Range (83), and Do not filter), and 'Installation Type' (with checkboxes for Portable (0) and Freestanding (83)). The main content area shows details for a selected product: 'Range', 'Annual Energy Consumption (kWh/yr): 186', 'Width x Height x Depth (inches): 24.0 x 35.0 x 25.0', 'Installation Type: Freestanding', and 'Additional Product Features: None'. A 'CLICK FOR PRODUCT DETAILS' button is at the bottom of this section. A 'Share Your Results' link is also visible.

Finding your Electric Stove, Cooktop or Range

5. To verify that your selected electric cooking product is ENERGY STAR® certified, you will need the **brand name** and the **model number**. In the Filter Your Results sidebar, scroll down to locate the Brand Name section. Select the brand name of your electric cooking product. **If you cannot find the brand name of your electric cooking product, it is not ENERGY STAR® certified.**

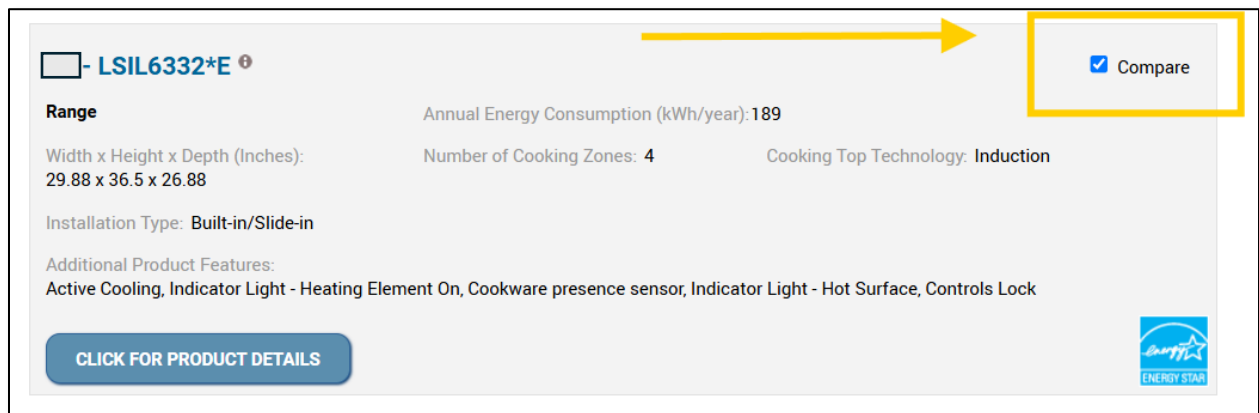

For example, JB256**DMCC** is a model number that is covered under the ENERGY STAR® certification for JB256***M*****.

Helpful Information

If you cannot match your electric cooking product model number to any of the listed products, your electric cooking product is not ENERGY STAR® certified and will not qualify for Georgia's Home Energy Rebates. However, you can use the ENERGY STAR® Product Finder to choose a new electric cooking product that is ENERGY STAR® certified.

Comparing Multiple Products

1. The ENERGY STAR® Product Finder has a feature that allows you to compare 2-4 products and their key characteristics at the same time. To use this feature, browse the ENERGY STAR® Product Finder website and click the **compare checkbox** for models you are interested.

- After selecting your 2-4 products, there will be a section at the top of the list with all the model numbers you have selected. To remove a model, hit the X at the top right corner of the grey box with the model number.
